BrokerPays Index of partner payouts — October 2026

370 partner programs of 207 brokers: what IB partners and affiliates are paid and what brokers publish openly. Figures of this issue are fixed as of Oct 28, 2026.

For 187 brokers of 207 the terms are collected with a source and a date and clear our minimum completeness bar; a rate is published for 167. The remaining 20 do have data, but only part of it — we are still filling the gaps. The full key set (at least 3 of 5: rate, payout frequency, minimum payout, payout methods, country restrictions) — 104 brokers. Brokers without the full set stay in the directory marked “terms being collected”: their programs exist, but some values are not disclosed yet or not checked by us.

Maximum published values from the brokers' own pages; they usually require volume or tier conditions — see each program page. Not a recommendation. Values above twice the market median are marked: they usually apply to a special account type or the top tier, so maxima are not directly comparable.

Rate per lot: gold (XAUUSD)

Official values only, where the broker's own wording names gold (gold, XAU, XAUUSD). The maximum rate is used, or the base rate if no maximum is published; USD per standard lot. Ordered by value.

Per-lot values without a stated instrument

These programs publish an amount per lot, but the broker's text does not name the instrument (FX major, metals, indices or other). They are not included in the FX medians or in the top list above; shown here separately, official values only.

38 programs · median $10 /lot · range $1 /lot – $38 /lot

Method

Official values only, from brokers' websites and documents (collected automatically or entered manually). Third-party sources and partner-reported data are excluded. Rate per lot is in USD per standard lot; programs paying a percentage of the spread are excluded from the median.
